

SICO

Swiss International College of Osteopathy

1.- 4. September 2019

We are pleased to invite you to take part in the **seminar** led by

Hélène Loiseau BSc Ost.

LMO 4 OSTEOPATHIC MECHANICAL LINK – The viscera

Objectives

This course proposes a new, simple and efficient osteopathic approach to the visceral field.

The different viscerorganic structures are first located in an original manner using cutaneous depressions then systematically examined with basic tests.

The examination of the gynecological sphere is performed comfortably and simply, externally, with tests that have been validated in terms of efficiency by intra-vaginal ultrasound.

The diagnosis of the visceral dominant osteopathic lesion is made by the tests in inhibitory balance and the normalization carried out by recoil

The complete examination of the viscera and resulting osteopathic treatment are thus

performed rapidly and efficiently within a few minutes.

« A course that will give you the necessary and sufficient tools to treat with confidence this most important field of osteopathy... »

Program

- **The digestive tract.** Basic tests and treatment of the pharynx, the esophagus, the stomach, the gallbladder, the duodenum, the small and large intestine.
- **The genitourinary organs.** Basic tests and treatment of the uterus, the ovaries, the prostate, the bladder and the kidney.
- **The abdominal organs.** Basic tests and treatment of the spleen, the pancreas and the liver.
